#### MENTORING EXPERIENCE

---

1. **Kwan Ho Ryan Chan, graduate student in René Vidal's lab.** I have been mentoring Ryan since 2021. We worked together on developing algorithms for explainable AI. This work was published in ICLR 2023. He is now extending the work to other computer vision problems beyond image classification.
2. **Ryan Pilgrim, graduate student in René Vidal's lab.** I mentored Ryan in the Fall and Spring semesters of 2023. Worked with me on exploring connections between Information Pursuit (an algorithm for sequential decision making) and greedy sparse coding algorithms. This work was accepted as a spotlight paper in NeurIPS 2023.
3. **Armand Comas, graduate student in Octavia Camps' lab.** I am mentoring Armand since Spring 2023. He is working on extending the explainable AI algorithm I had developed as part of my PhD thesis for classification problems to generative modelling.
4. **Stefan Kolek, graduate student in Gitta Kutyniok's lab.** I am mentoring Stefan since Fall 2023. He is working on learning interpretable features from data that in turn can help in explaining the decisions made by a machine learning model. This work is currently under submission at CVPR 2024.
